

PROFESSIONAL SUMMARY

Data-driven IT Consultant and Analyst with end-to-end experience managing enterprise-grade legal compliance platforms. Skilled in SQL (SSMS), C# (.NET), Power BI, and Python, with a proven track record in backend administration, automated feature development, IIS server management, and client onboarding. Adept at translating complex backend requirements into actionable technical solutions and delivering high-level technical training to C-suite stakeholders and multi-site enterprise teams.

TECHNICAL SKILLS

- **Languages & Frameworks:** Python (Pandas, NumPy, Scikit-learn), SQL (SSMS), C#, .NET, DAX
- **Analytics & BI:** Power BI, Dashboard Development, Predictive Analytics, KPI Reporting, Statistical Evaluation
- **Tools & Platforms:** IIS Server, Git, GitHub, VS Code, Jupyter Notebook, MySQL, Excel

EXPERIENCE

IT Consultant — Proind Business Solutions | Oct 2025 – Present

- **Platform Management & Stakeholder Training:** Spearheaded the end-to-end administration of an enterprise legal compliance platform, delivering technical onboarding and tailored system training to 40+ cross-functional users, including CFOs and Plant Heads.
- **Feature Engineering (C# & .NET):** Engineered a custom PDF report generation module in C# to automate fortnightly compliance status reporting for upper management, significantly improving executive visibility into plant-level compliance metrics.
- **Database Management & SQL Optimization:** Authored and optimized complex SQL queries and SSMS stored procedures to facilitate custom data extraction (e.g., keyword-driven GST compliance audits) and resolved critical bugs in automated email alerts.

Ethical Hacking Intern — Internshala | Sep 2023

- Identified and documented 12+ data integrity vulnerabilities on a live e-commerce application.
- Categorized risks by severity and delivered a prioritized, data-driven remediation report for key stakeholders.

EDUCATION

Bachelor of Technology, Information Technology

2020 – 2024

Swami Keshvanand Institute of Technology (SKIT), Jaipur
CGPA: 8.77

PROJECTS

Python - SQL - Power BI - Excel

Indian Retail Performance Analysis

- Improved retail strategy by examining 12,960 sales records, identifying Fashion (+30.2% margin) as a growth driver and Groceries (-3.5% margin) for cost optimization.
- Developed an interactive Power BI dashboard featuring 20+ complex SQL queries and DAX measures, improving stakeholder data accessibility and enabling faster, data-driven decisions.

Python - SQL - Power BI

UPI Transaction Growth & Trend Analysis

- Uncovered 7,860% growth in UPI volume and 50% drop in average transaction value by analyzing 6 years of NPCI data.
- Built forecasting model (Prophet, Statsmodels) predicting UPI volumes 24 months ahead, incorporating yearly seasonality for higher accuracy.
- Designed and built a dynamic Power BI dashboard with DAX measures to visualize KPIs and trends for stakeholders, translating complex data into actionable business insights.

Multidomain Data Analysis Projects

SQL - Power BI

- E-commerce Sales Analysis: Engineered a Power BI dashboard analyzing 5,615 transactions (₹438K sales) to identify key profitability and customer behavior drivers.
- Music Store SQL Analysis: Performed advanced SQL queries (CTEs, Window Functions) across 11 tables to derive marketing insights on top genres, customers, and locations.
- IBM HR Attrition Analysis: Built a dashboard to analyze 1,470 employee records, identifying that low salary was the primary driver for 69% of attritions.
